

Welcome to the homepage of Syncom BV. We are a contract research company active in all aspects of organic synthesis.

We focus primarily on the pharmaceutical industry although we are also active in organic materials and work for the electronics and photo industries. We are well known for our special expertise and experience in the resolution of racemates with the aid of the patented technology known as Dutch Resolution.

Explore this site to find out about us, our people, our facilities, how we work, how to reach us and more.
